

Main sizes	2
Lift height - standard	3
Lift height with AC 001 extender	4
Lift height using customized AC 001	5
AUN 200 customized for choppers	6

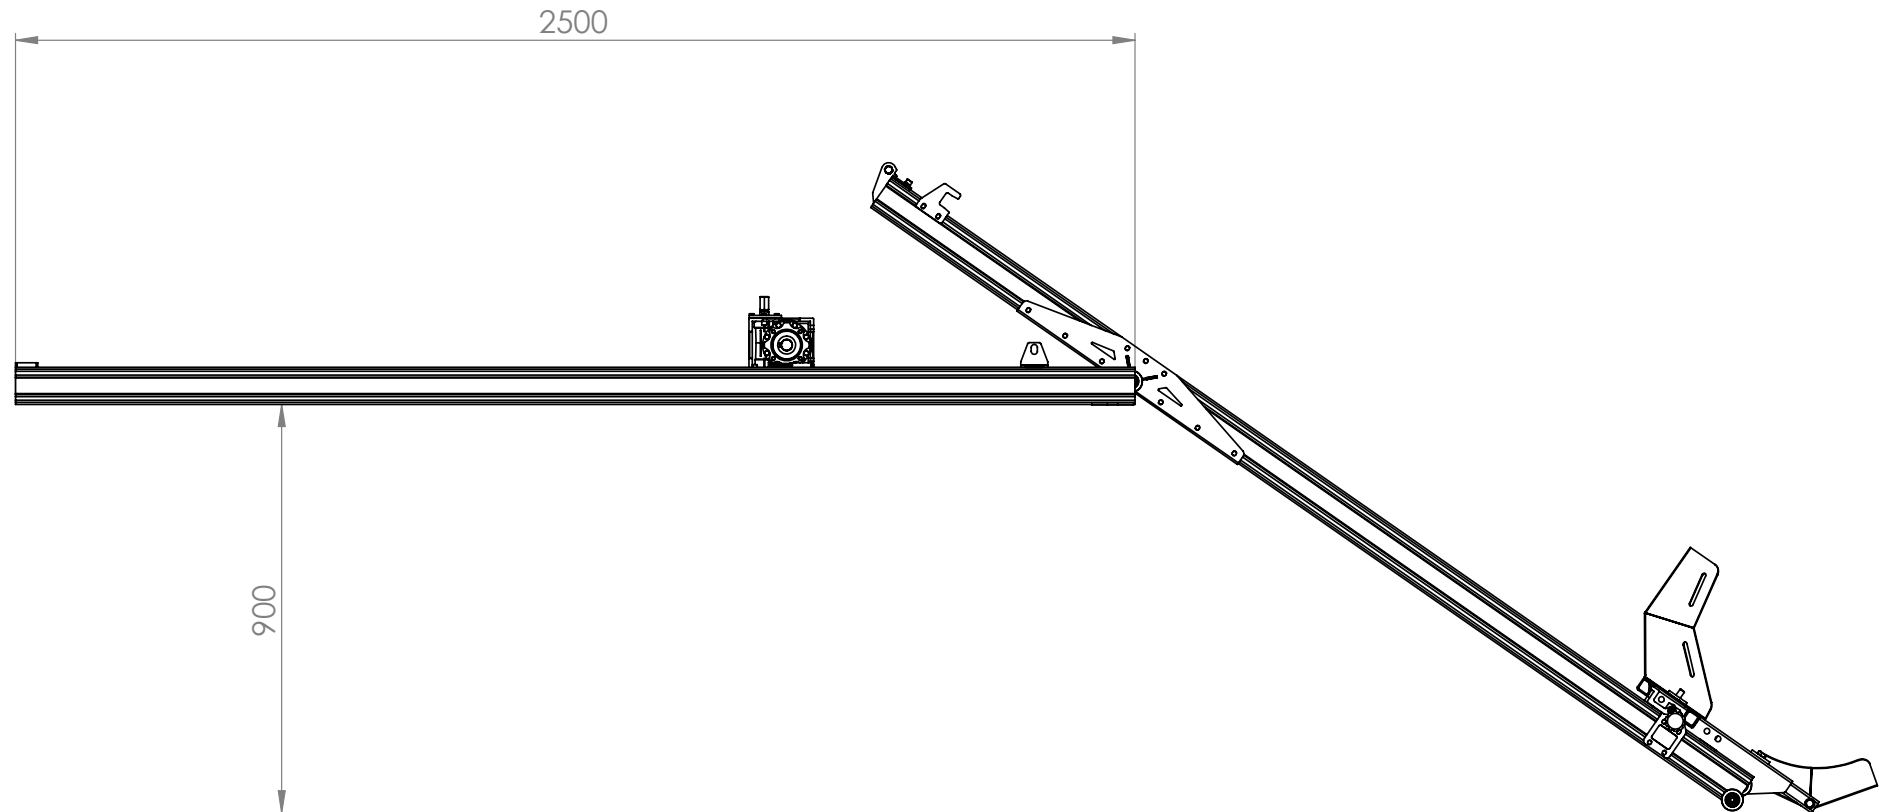

Empty weight - 85kg

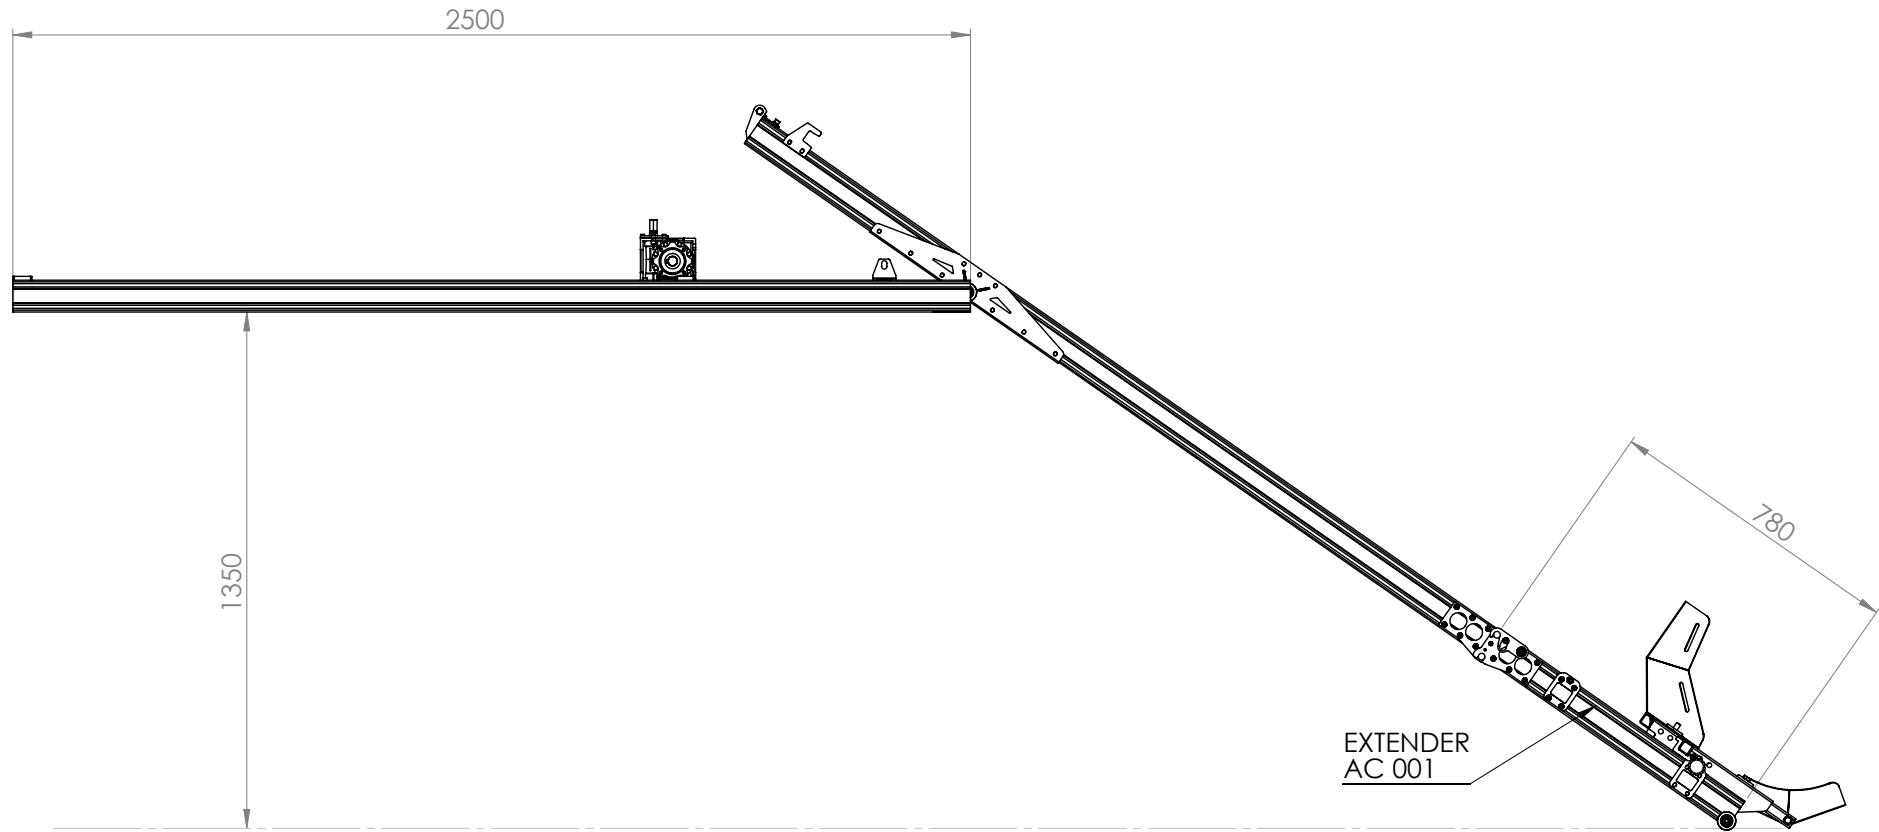

Max load 550 kg

Ramp adds 85mm to the motorcycle height when loading. However if the front struts of the motorcycle are compressed 85mm, the ramp adds no height to the loaded motorcycle.

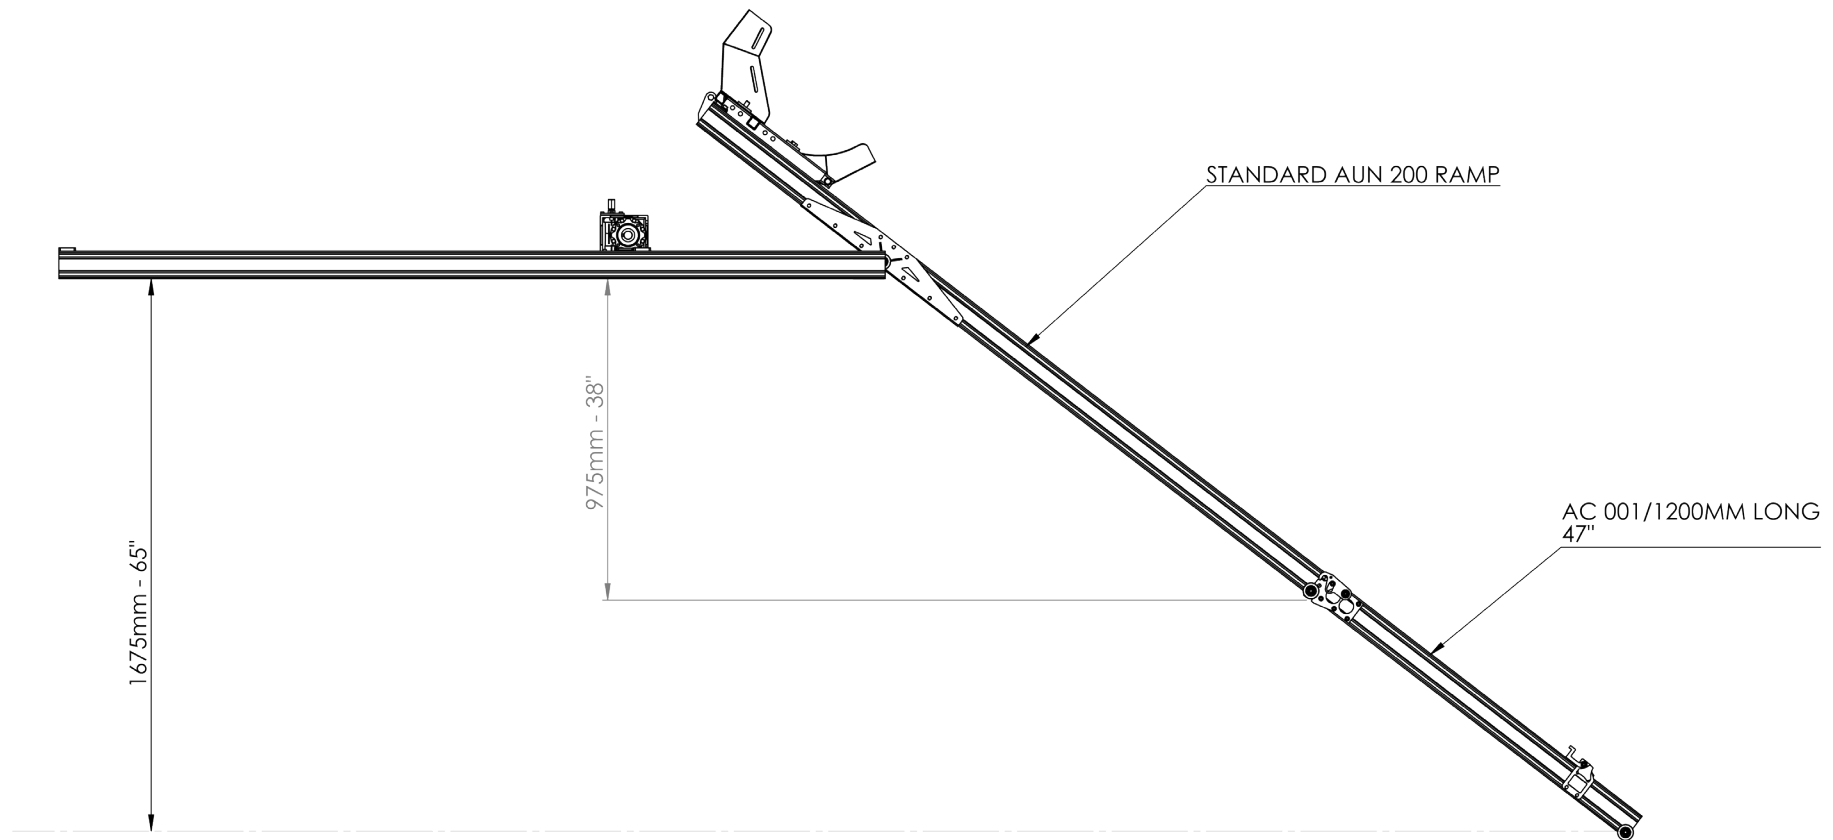

Lift height is max 900mm in its standard version.

AUN 200 lift height using AC 001 extender

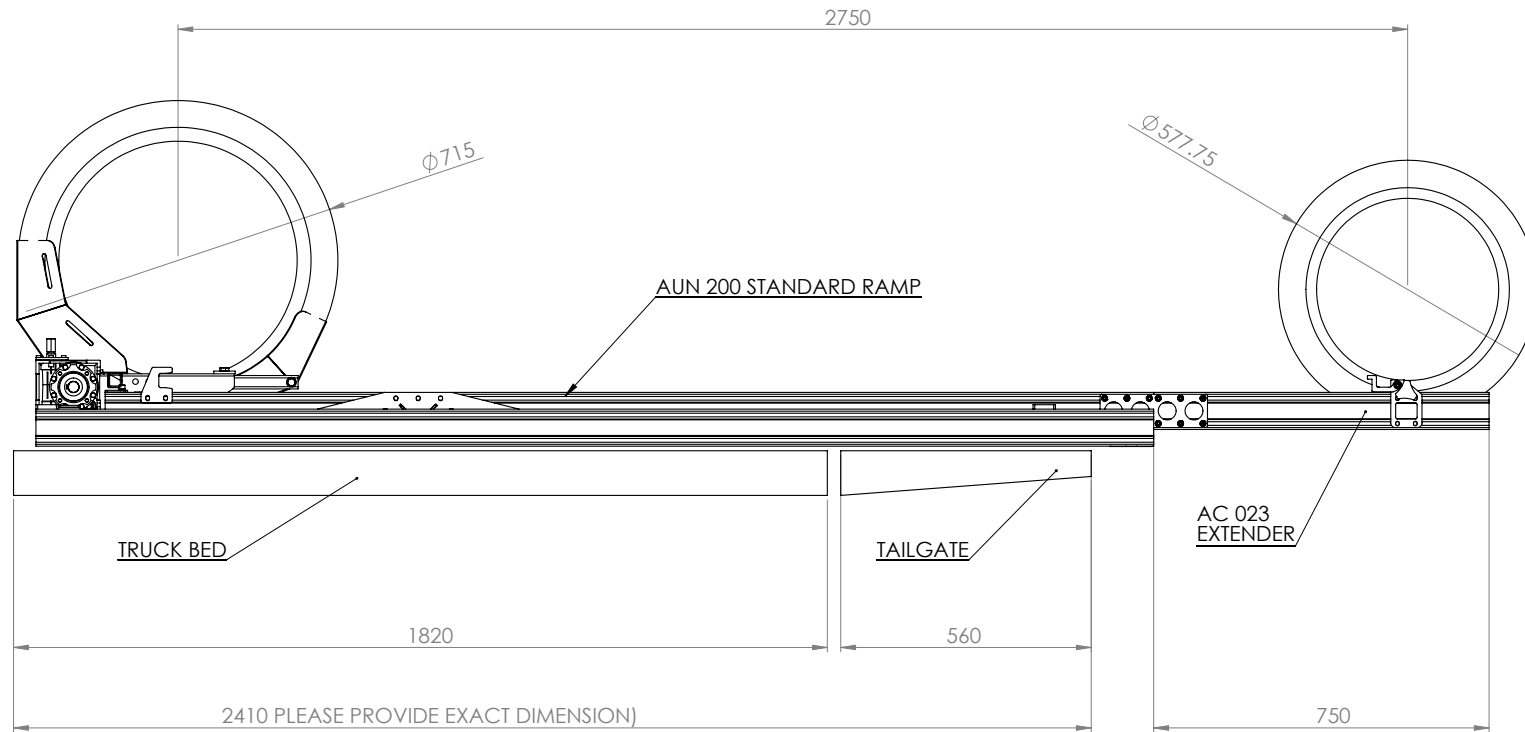

Lift height is max 1300mm using a standard AC 001 extender. Longer extenders are available upon request.

AUN 200 lift height using AC 001 custom extender

Lift height can be in excess of 1,6 meters if you use a longer AC 001 extender. Upon request only.

AUN 200 customized for choppers

Using the AC 023 extender, the standard AUN 200 can load 3 meter long choppers.
